

**Forward Thinking Partners (FTP) Establishes Joint Venture Partnership with
Leading Ukrainian Offshore Technology Outsourcing Organization.**

Indianapolis, Indiana, USA
Kiev, Ukraine

September 1, 2007

Forward Thinking Partners (FTP), a business optimization company headquartered in Indianapolis, today announced that it has invested in, and will help manage, The Institute in Kiev (THINK) - which specializes in offshore technology outsourcing services. Together with Ukraine's Institute for Problems of Mathematical Machines and Systems and The Academy of Technology of Ukraine (both est. in 1992), THINK, LLC is a public/private joint venture partnership - owned and operated by American and Ukrainian leadership - dedicated to the design, development and implementation of world-class information technologies and solutions. Thanks to the tenure, experience and comprehensive expertise of more than 1,000 talented and dedicated professionals, THINK provides corporations and governments - on a global basis - with reliable, trustworthy and cost-effective services, including:

- Software Design, Development and Implementation
- Mobile, Wireless and Web Solutions
- Complex Database Solutions
- Systems Migration and Integration
- Staff Augmentation
- Remote IT Management, Maintenance and Support

As part of the investment/management agreement, FTP will assist with short and long-term strategy development, branding, marketing and sales, operations, HR, finance, and accounting. "We like the model, the market, and the opportunity," said Scott Abbott, Managing Member of FTP. "Thanks to our extensive research and validation, coupled with the proven talent and integrity of our partners in Ukraine, we are confident that we can grow THINK to be a premier offshore technology outsourcing company."

"We're very excited here in Kiev, to have FTP help us with this business," said, Alex Morozov, President, THINK. "The fact that we have decided to focus our efforts primarily on the U.S. market; that FTP has significant experience in professional services, technology and business optimization; and that our 1,000+ experts in Kiev have already worked on hundreds of mission-critical assignments with governments and corporations from around the world over the last 15 years, we believe that we have the right focus, talent and resources to be a leader in quality, cost-effective offshore technology outsourcing services."
